Current UI of the app (screenshots, 2026-10-21, dark theme, mock data)

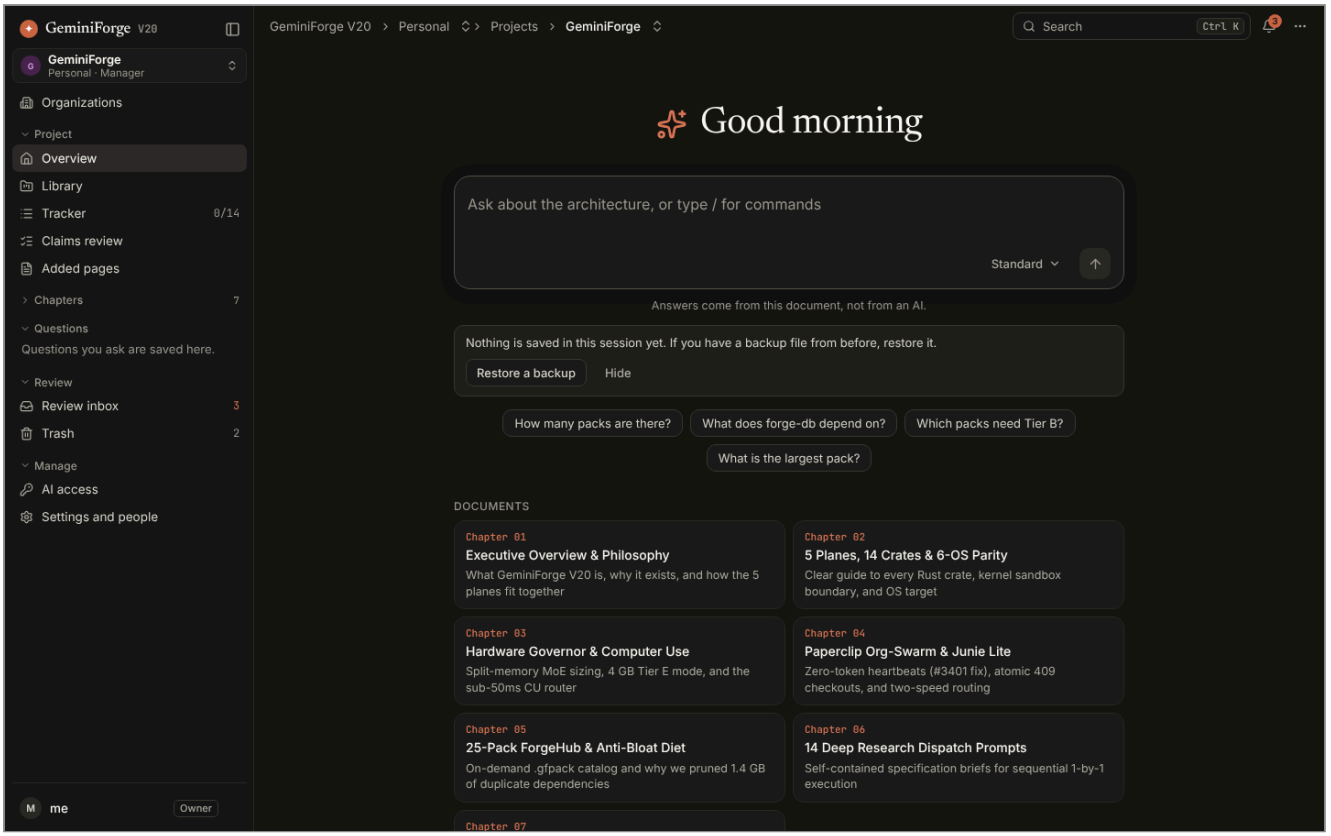

The app is dark-only. Sidebar width 272 px, rows 30 px high. These screens are what exists today; the research should critique and improve them.

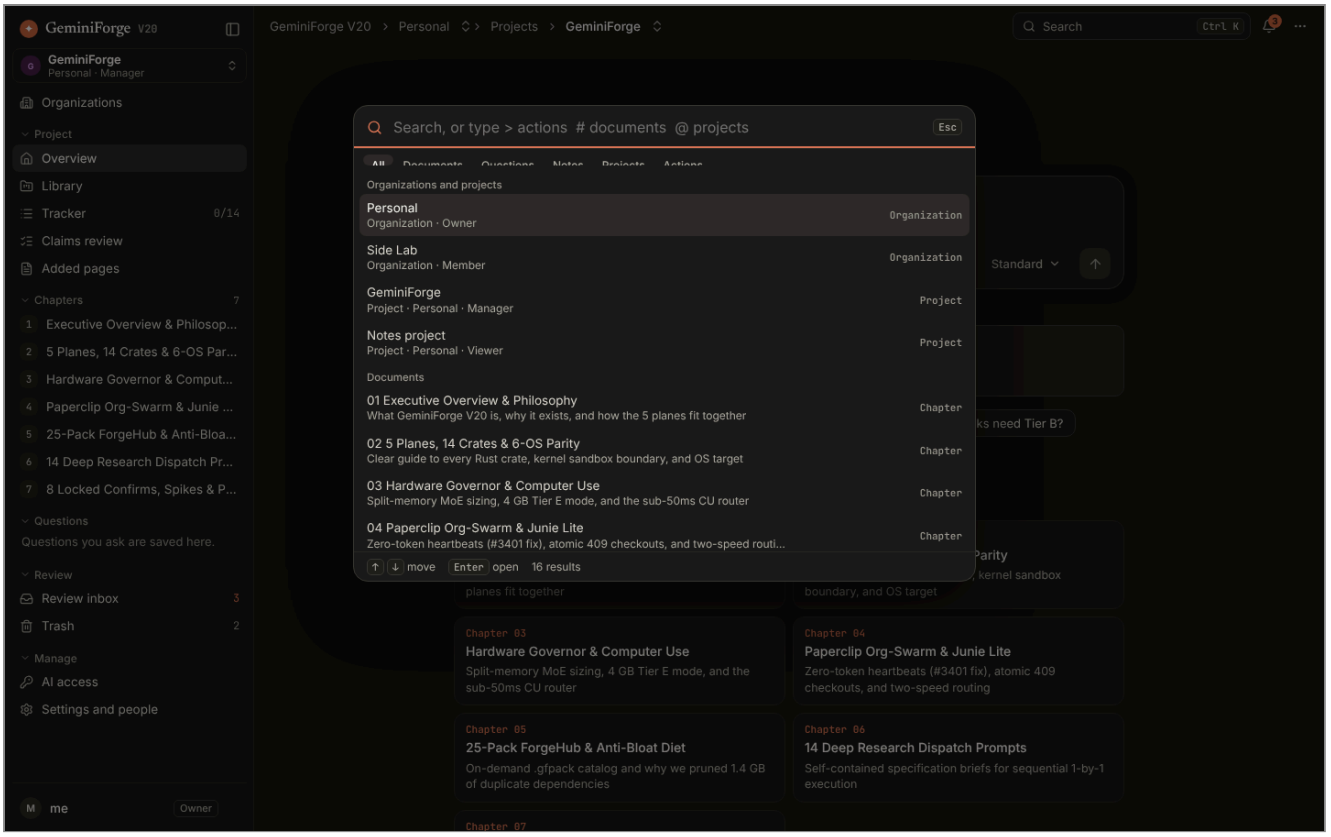

Start page: Organizations as cards (search, role filter, sort, card or list layout, New organization).

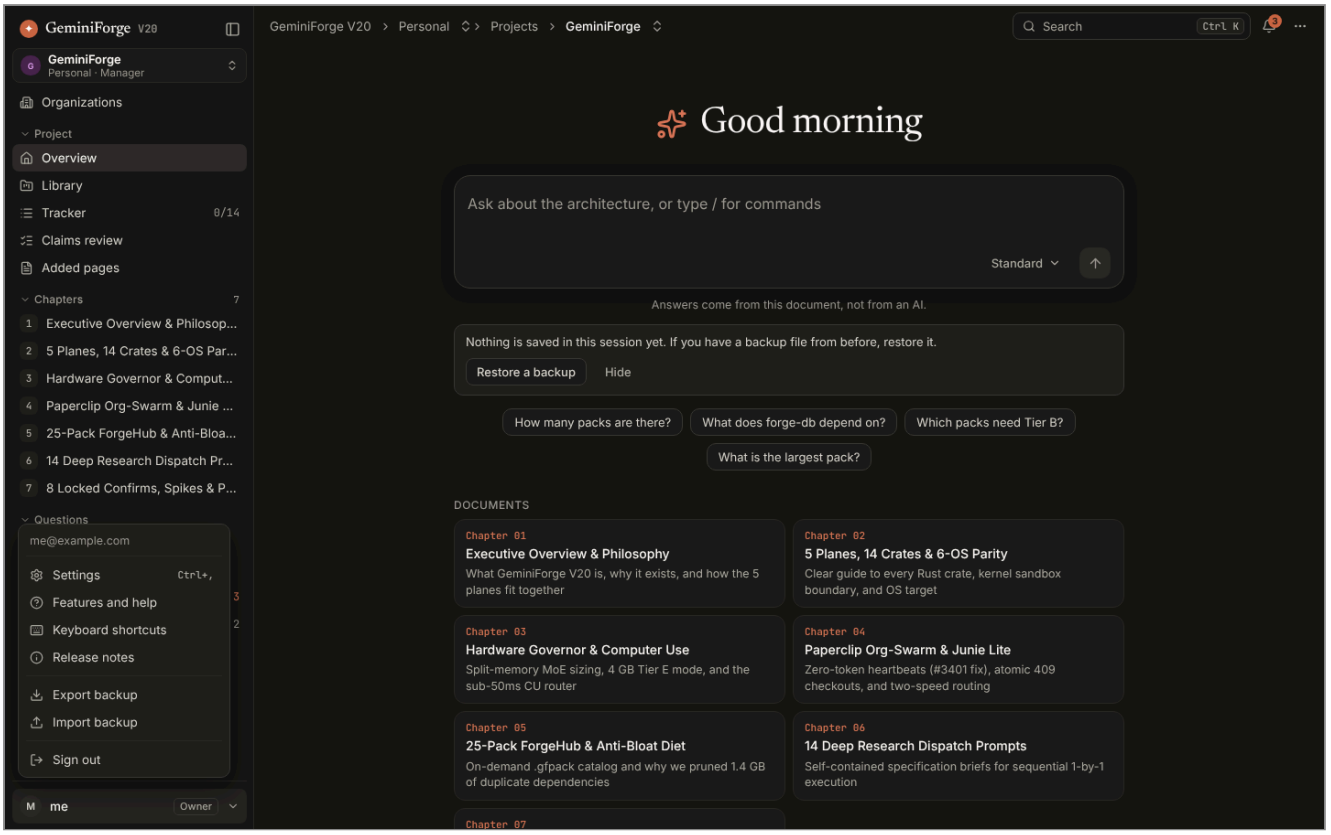

Organization page: tabs Projects, People, Invitations, Activity, Settings; project cards; Invite button always visible; breadcrumbs with switchers.

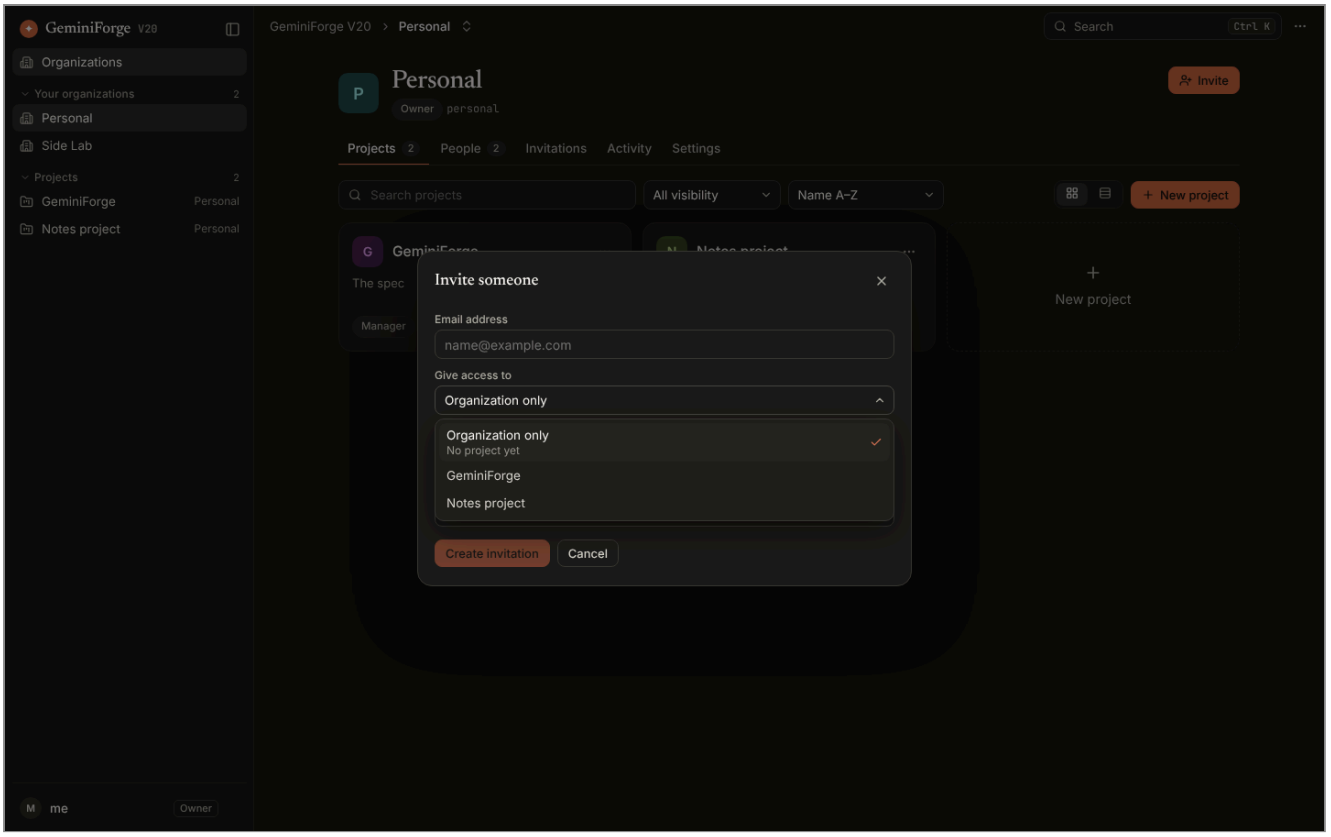

Project home: sidebar groups (Project, Chapters, Questions, Review, Manage), question bar, document cards, header search pill, notification bell.

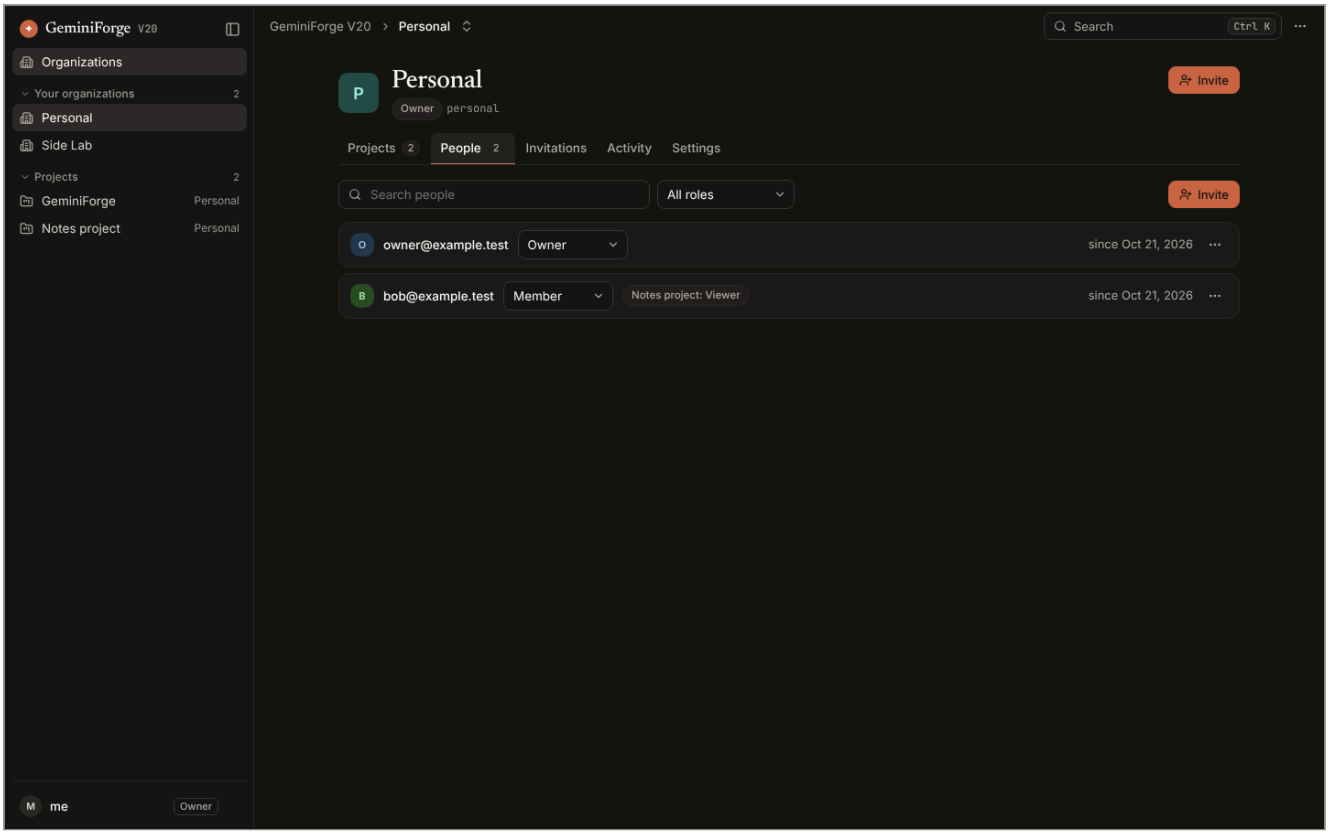

Command palette (Ctrl+K): scope tabs All, Documents, Questions, Notes, Projects, Actions; prefixes > # @.

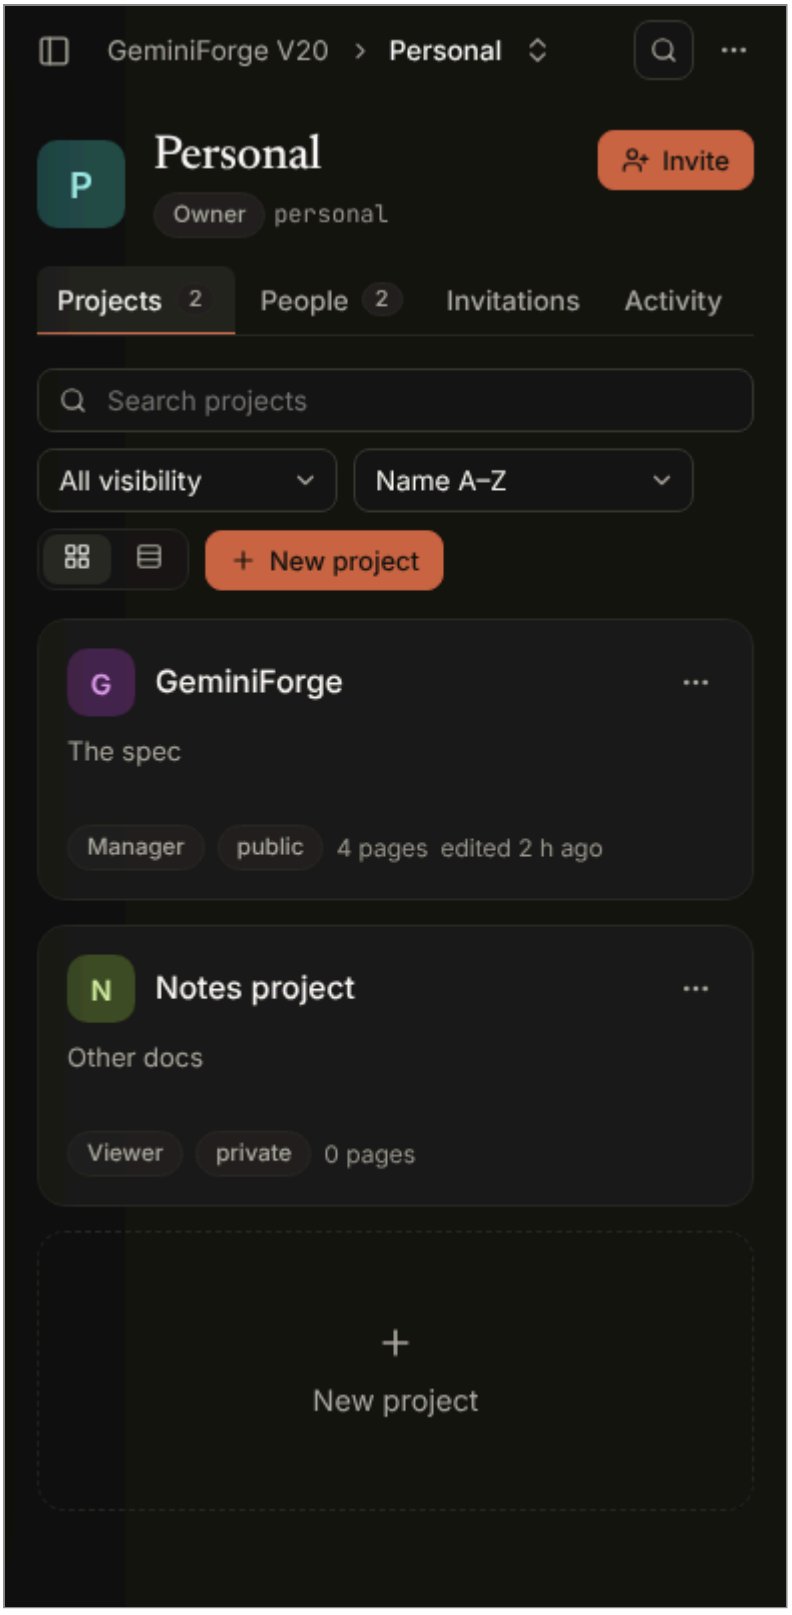

Account menu at the bottom of the sidebar (compact, narrower than the sidebar).

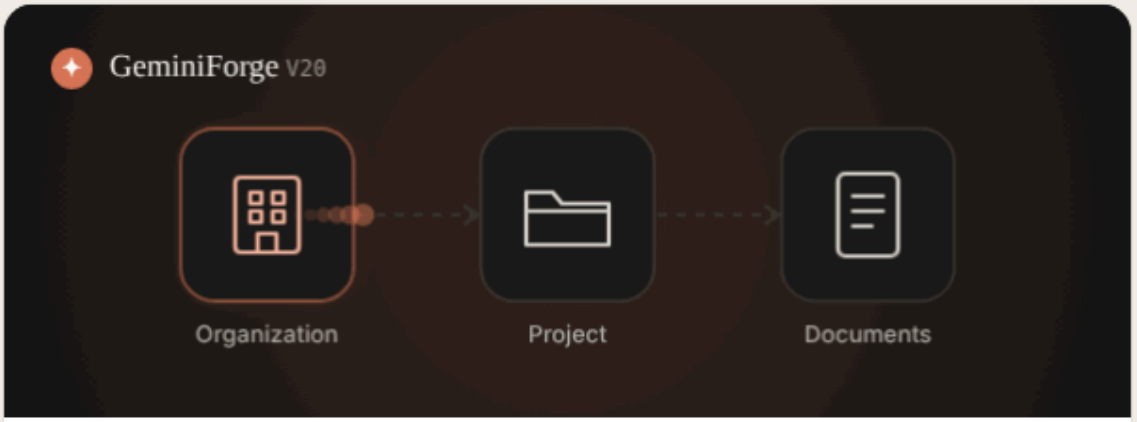

Invite dialog with the custom animated dropdown.

People tab with role dropdowns and project role chips.

Phone layout (390 px wide) of the organization page.

You’re invited to GeminiForge

Muhammad invited you to join the project **GeminiForge** in **Personal** as **Editor**.

Accept invitation →

Organization	**Personal**
Project	**GeminiForge**
Your role	**Editor**
Valid for	**7 days**

How it works

1. Open the link and sign in with **name@example.com**.
2. Press *Accept invitation*. Nothing happens until you do.

Button not working? Copy this link into your browser:
https://geminiforge-workbench.vercel.app/#/join/iv_0123456789abcdef0123456789abcdef0123456789abcdef0123456789abcdef

If you weren’t expecting this, you can ignore this email and nothing will happen. The link works once and expires in 7 days. Reply to this email to reach Muhammad.
